### Eruptions of the Skin Cause Tortuous Itching

quainted with the flaming, burning itching that these diseases produce.

So many people continue to suffer from ecsema, tetter and other forms of skin disease because they do not seek the source of their suffering, and no disease can be successfully combetted unless attacked at its source.

Skin diseases are caused by an impurity or disorder in the blood, and there is no real and genuine relief-within your reach until such impurities are removed.

Skin continued to suffer in the treatment of these discordens in the treatment of these discordens, because it is such a thoroughly satisfactory blood purifier. Begin taking S. S. There is hardly a week passes in this store but that at least one young couple come in here—sometimes the girl alone and sometimes the man alone—pick out a piece or two of furniture and commence paying on it.

Naturally it costs more to furnish a home these days. While furniture did not advance, proportionately, as much as other commodities, still so much must be bought if the home is to be properly furnished, that the sum total runs into considerable money.

The purpose of this ad is but a suggestion. For instance, there are more than a half dozen young ladies paying for their Hoosier Kitchen Cabinet, but we have no instructions, yet, alto where and when the cabinets are to be delivered.

It costs a lot of money to get married, and it certainly helps when you Own a good part of the furniture you are sure to need.

If you will take a walk thre the store your eye may rest on some nice piece that you will want to start to buy right away. You are welcome to look around all you like, and you need not have a salesman accompany you, unless you wish one.

# Street Railway Facts:

The recent report of the Federal Electric Railways Commisssion to President Wilson contains the following:

"For the purpose of restoring credit, it seems to be the general impression of all witnesses that the first necessity is for the industry to put into effect such economies of operation as will enable it to give good service at the lowest cost. Generally speaking, this can be done by the elimination of deadheads and other free service, the abandonment of non-profitable lines, and where practicable, the substitution of one-man cars for heavier equipment."

As previously stated, this company is willing to render any service which the community desires and is willing to pay for, but it believes that it is its duty to point out possible economies which will have the effect of preventing further increases in fares and possibly later reducing them, and at the same time increase the service. With the thought in view only of giving information which would assist the public in forming its conclusions as to wha t it desires, the company is giving some information in regard to safety cars.

Wages of trainmen have increased from 29 cents per hour in 1914 to 70 cents per hour in 1920, an increase of 141 per cent. During the same period coal has increased over 300 per cent.

A person receiving the same wage as a trainman in 1914 worked 10 1-3 minutes to pay for his five-cent fare, while in 1920, if he receives the same wage that the trainmen receive, he will only have to work 8½ minutes to pay for a ten-cent fare.
